**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on February 8, 2007 has been entered.

***Information Disclosure Statement***

2. The information disclosure statements (IDS) submitted on February 8<sup>th</sup> 2007 has been considered by the examiner. The examiner has deemed while at least some of the cited documents teach laser engraving processes and compositions comprising at least one laser enhancing additives claimed by applicant (see US 5,075,195), these references lack and/or do not require a second quantity of another laser enhancing additive nor do they require a host material that has been modified to increase the thermal conductivity of nor do these cited references render this limitation obvious and/or provide guidance to an ordinarily skilled artisan to modify any of said materials within the compositions to increase the thermal conductivity and incorporating the claimed laser enhancing additive mixtures as claimed.

***Allowable Subject Matter***

3. Claims 1-24 are allowed.

4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims is the laser enhancing additive comprising a first quantity of at least one CuKI3, CuI, KI, NaI and AlI; and a second quantity of at least one ZnS, BaS, alkyl sulfonate and thioester in combination with a modified, for increased thermal conductivity, host material. The prior art (see PTO 892) teaches compositions having laser engraving properties; however these compositions and method teach adding laser absorbing compounds, such as sensitizing dyes or fillers, such as

carbon black. The prior art fails to teach articles of manufacture having the claimed laser additive in the preparation of said articles or in different layers of laminates used in preparing said articles of manufacture. The instant invention is distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
